SUMMARY

Full-Stack Frontend Engineer with 2+ years of experience building production-grade SaaS and ERP-style web applications using React, Next.js, Vue, and Node.js. Experienced in architecting scalable UI systems, SSR applications, multilingual platforms, and data-heavy dashboards. Strong in API integrations, performance optimization, and AI-assisted development workflows. Comfortable owning features end-to-end from database to deployment. Seeking high-impact remote opportunities in product-focused teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue 2/3, Nuxt 2/3, TypeScript, JavaScript (ES6+)

Backend: Node.js, Express.js, PostgreSQL, MongoDB, Supabase, REST APIs

UI & Styling: Tailwind CSS (v3 & v4), shadcn/ui, Material UI, Vuetify, PrimeVue, Bootstrap, Storybook

State Management: Redux, Zustand, Vuex, Pinia

Architecture & Tools: SSR, Monorepos, Vite, Webpack, Git, CI/CD basics, API design, Role-based systems

AI-Assisted Development: Claude, Cursor, Blackbox-AI, Copilot, AI-powered IDE workflows (code generation, refactoring, debugging, test writing)

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend)

Ranium Systems Pvt. Ltd., Nagpur

Oct 2024 – Present

- Building scalable ERP-style SaaS applications across React, Vue 2, and Vue 3 (Nuxt).
- Developed and scaled a Storybook-driven design system within a monorepo used across multiple ERP modules.
- Delivered a multilingual platform (7 languages) with consistent UX and locale-aware routing.
- Implemented Tailwind v3 → v4 migration with zero UI regression.
- Built secure identity verification module integrated with GBG APIs for compliant onboarding.
- Architected reusable cross-framework UI components shared between React and Vue applications.
- Contributed to LaraCon platform — real-time gamification system with live scoring and interaction flows.
- Collaborated with UK stakeholders in Agile sprint cycles; owned feature delivery end-to-end.

Associate Software Developer

CodeNicely, Raipur

Feb 2024 – Sep 2024

- Built and maintained a full ERP-style Bar Management System handling inventory, pricing, billing, and admin workflows.
- Integrated 100+ REST APIs including Google Maps, payment gateways (Razorpay), and charting systems.
- Improved performance by ~70% via SSR implementation, caching strategies, and optimized data flows.
- Migrated legacy Livewire system to modern React architecture for an Event & Ticketing platform.
- Built seat selection engine, admin dashboards, and payment workflows.
- Developed multilingual & RTL-ready auction flows for a Real Estate bidding platform.
- Improved SEO and Web Vitals through dynamic routing and image optimization.
- Used AI tools to accelerate feature development and debugging while maintaining code quality.

Recruitment Specialist → SME → Team Lead

SGS Consulting, Raipur

Aug 2021 – Sep 2023

- Led recruitment teams, analysed performance, prepared Excel-based data dashboards, and managed end-to-end hiring across IT, Finance, biotech, and Pharma.
- Acted as the main liaison for candidate sourcing and issue resolution across multiple teams.

PERSONAL PROJECT

FitNest (Full-Stack SaaS Fitness Tracker) [GitHub](#) | [Live](#)

Next.js | PostgreSQL | Supabase | shadcn/ui

- Built a full-stack wellness platform with authentication, daily goals, calorie tracking, yoga routines, and meditation modules.
- Designed database schema and backend APIs for scalable user progress tracking.
- Implemented responsive dashboard with optimized rendering and efficient state management.
- Focused on clean UI architecture and production-grade performance.

EDUCATION

B.Tech in Aeronautical Engineering

Malla Reddy College of Engineering & Technology, Hyderabad

2021
